

SERVICES FOR USERS OF LIQUID NITROGEN AND OTHER CRYOGENIC FLUIDS

EQUIPMENT WE SUPPLY AND SERVICE

1. Vertical and Horizontal LN2 Storage Vessels
2. On-Site Liquid Nitrogen Generation Systems
3. Vacuum Insulated Pipe, Valves and Equipment to Deliver LN2 to Its Point of Use
 - a. Hard and Flexible Vacuum Insulated Pipe (VIP)
 - b. SSV (Safety Shutdown Valves) for Emergency Stop of LN2 Flow
 - c. Y-Pattern, T-Pattern and Miniature Vacuum Insulated Cryogenic Valves
 - d. LN2 Injectors for Packaging Systems
 - e. Phase Separators
 - f. Vapor Heaters
 - g. Cryovents/Keep-Full Vapor Release Devices
 - h. Automated and Manual Control Dewar Filling Systems
4. Food Freezing Tunnels and Cryogenic Batch Freezers
5. Cryobiological Storage Freezers
6. Oxygen Deficiency and Gas Detection Systems
7. Integrated Control Systems

APPLICATIONS WE SERVICE: SOME OF THE MOST COMMON

1. Molecular Beam Epitaxy (MBE)
2. Scanning Tunneling Microscopy (STM)
3. Scanning Electron Microscopy (SEM)
4. Thermal Vacuum Chamber Testing (TVAC)
5. Food Freezing
6. Cryopreservation and Biobanking
7. Food and Beverage Packaging
8. Healthcare
9. Research Laboratories
10. Shrink Fitting
11. Process Cooling/Cold Trapping
12. Cryotherapy

SERVICES PROVIDED TO USERS OF LIQUID NITROGEN AND CRYOGENICS

1. Facility Master Planning for LN2 and Cryogenic Systems
2. System Design and Permitting
3. Installation and Commissioning
4. Repair and Preventive Maintenance
5. Inspections, System Evaluations and Audits
6. Purchasing Assistance
7. ODH and Safety Evaluations
8. Operator Safety Training
