

SGS Safe Touch Pro – TankMaster™ Edition

Comprehensive Control for Bulk Oxygen Storage, Delivery, and Distribution Systems.

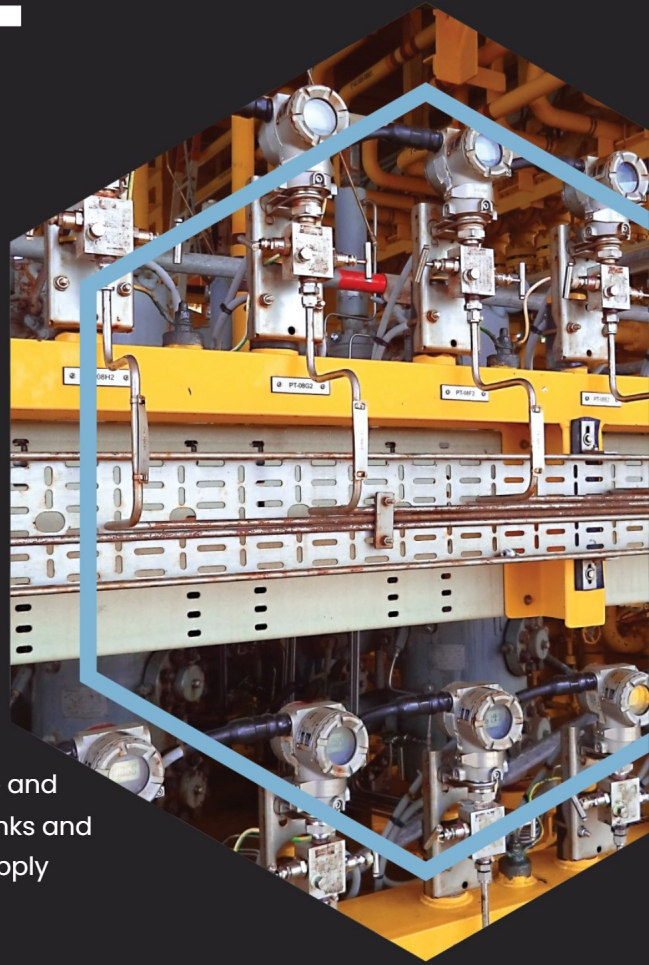

Introducing the SGS Safe Touch Pro – TankMaster™

The TankMaster™ Edition of the SGS Safe Touch Pro is a UL Listed, SIL 2-rated, 12" touchscreen control platform built to manage and monitor hospital bulk oxygen systems 24/7. From cryogenic bulk tanks and vaporizers to reserve cylinder banks, TankMaster™ brings safety, supply monitoring, and alarm integration into one intelligent panel.

- ✓ Designed to meet applicable codes: NFPA 55 & 99, OSHA, IFC, CGA, and IBC
- ✓ Optimized for medical oxygen, and also supports nitrogen, argon, helium, carbon dioxide (CO₂), hydrogen, and other medical, industrial, or specialty gases
- ✓ Ideal for: hospitals, medical centers, surgical centers, long-term care facilities, oxygen suppliers, laboratories, and research campuses

Core Bulk Oxygen Safety & Control Features

- ✓ Multi-Tank Level, Pressure, and Temperature Monitoring
- ✓ SSV (Safety Shutdown Valve) Control and Position Feedback
- ✓ Vaporizer Cycling & Automatic Reserve Switchover
- ✓ Reserve Cylinder Bank & Backup Supply Integration
- ✓ Flow Sensors, O₂ Usage Tracking, and Pressure Zone Management
- ✓ Low Liquid Level, Reserve-In-Use, and Line Pressure Alarms
- ✓ Alarming for Pressure, Flow, Temperature, and O₂ Levels
- ✓ Leak Detection and Seal Interlocks
- ✓ E-Stop Handling with Full Shutdown Logic
- ✓ Integrated Oxygen Purity Analyzer Feedback

Advanced Integration & Inputs

- ✓ Supports every part of your oxygen supply, whatever the source:
 - ✓ Cryogenic bulk oxygen tanks
 - ✓ Reserve cylinder banks
 - ✓ Tube trailers
 - ✓ Dewars
 - ✓ Oxygen generators (PSA)
- ✓ Interfaces with:
 - ✓ Fire Alarm, BAS, BMS, and Building Safety Systems
 - ✓ Medical Gas Master Alarms, Purity Analyzers, Vaporizers, Pressure Controls
 - ✓ Local Control Panels or Interlock Stations
- ✓ Protocols supported: ProfiSafe, ProfiNet, Modbus, Profibus, Analog/Digital IO

Certifications & Compliance

- ✓ UL 508A Listed Control Panel
- ✓ SIL 2 Certified per ISO 13849-1 & IEC 61508; SIL 3 available on a case-by-case basis
- ✓ Designed to meet or exceed CGA guidelines, NFPA 99, and fire/building codes

Full System Applications

Bulk Oxygen Tank Management

- ✓ Monitor and control level, pressure, and flow for each tank
- ✓ Coordinate tank switching, vaporizer cycling, and alarm escalation

Cryogenic Yard & Room Safety

- ✓ Interlocks for cold zones, exhaust verification, and door seals
- ✓ Emergency dump logic and gas flow cutoffs

Oxygen Purity Management

- ✓ Real-time analyzer integration with automatic switchover to reserve supply
- ✓ Sampling logic and low/high purity alarms

Reserve & Backup Supply Integration

- ✓ Oxygen generator output control and balance
- ✓ Tube trailer and cylinder bank inputs with supply priority logic

Delivery & Main Line Control

- ✓ Line pressure control, purge logic, cycle timing, and usage logging

Why Choose TankMaster™?

- ✓ Built for critical, multi-source medical oxygen supply
- ✓ Designed by gas control specialists with real-world field experience
- ✓ Integrates every part of your oxygen delivery and safety system
